Comments on the subject REACH

Dear Sir or Madam,

As a so-called "downstream user", PETER electronic GmbH & Co. KG is affected by the new EC Chemicals Legislation. In their total operational processes, several chemical substances having a low risk potential are used only to a small extent.

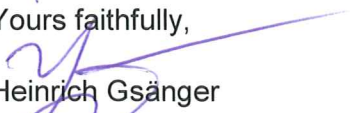

PETER electronic is not and has not been affected by the obligation to register dangerous substances.

After the basic materials used for the products of PETER electronic have been thoroughly examined, it was found that none of them contains the substances indicated in the „Candidate List of Substances of very high Concern for authorization“ issued by ECHA.

In the future too, PETER electronic will continue to endeavor to give appropriate consideration to the tasks resulting from REACH.

We will be pleased to be at your disposal if you have any further questions.

Yours faithfully,

Heinrich Gsänger
Security officer
